Drawing has been a passion all my life, and today my major media is acrylic paint on canvas.

I am currently extending my creativity to sculpting and creating different objects such as lamps and pots in concrete.

My paintings are abstract and contemporary; I am experimenting with shape, colors and different techniques.

The vivid colors are meant to induce happiness and vitality to the viewer.

I am working with intuition and expressionism.

The process is investigative, and the randomness of sudden intuitive shapes and strokes, are creating a multitude of paths.

My final goal is to bring the viewer on a trip in to their own imagination.

My inspiration I get from shapes and colors from nature and travelling.

My exhibitions so far has predominately been in Denmark.
