

Michal Avrech

An Artist and art therapist, graduated from the University of Haifa in art and special education. M.A in Art Therapy

I paint acrylic paintings of abstract and dynamic landscapes. The landscape emerging out of energetic brush strokes, thick layers of color and bold mixes is a kind of dream come true. It is an inner imaginative thought about the landscape of the world and the landscapes of the soul

Expanses of fields, forests, rocks, flowers, earth and sky- this is the reality we all know, but for me it is an excuse for telling my story, along with the deepest reflections and moments of joy

The joyful and rich colors of my paintings express also yearning for freedom and calmness. Since childhood, I have been painting, influenced by impressionist and expressive paintings that express feelings and describe the moment and the changing atmosphere during the day

For the past 26 years I have been an art therapist, working mainly with youth at risk, and I do so with love and a sense of mission. I combine my work as a painter with this blessed work, and my paintings give me relaxation and optimism

My acrylic paintings are also accompanied by illustrations of the children's books. So far I have illustrated nine books

In the past few years I have exhibited in many joint exhibitions in Israel and around the world

.Art Exhibition in Tel-Aviv port gallery, 2015, curator Shiri Meir
