

Relinde Kattenberg (Harderwijk, The Netherlands)

Relinde has developed her own style in bronze over the past few years. She wants her pieces to invite discussion about emotions, thoughts, social themes and so on – in whatever form – in order to bring about a growth in consciousness.

Relinde is inspired by the relationships between God, man and nature. In her work she tries to express these aspects as much as possible. Relinde exhibits at home and abroad, and her sculptures can be seen at various locations. Her work is included in collections in the Netherlands, Belgium and Germany.
