Sergey Jelezky Is founder and stable participant of Wanderer group. The direction in which the painter works is at the junction of postmodernistic and surrealist concepts of image- development. The painter actively applies esoteric knowledge in his creative method.

The events, happenings in the world being created by the painter, testifies the fact that he does not target building an aesthetic or commercial creative line, he is creating the space of independent visual ideas and irrealities that are closest to him in terms of spirit and subconsciousness.

A.D. Mikhailyuta, fine arts critic
