

Hello I'm Richard Post, 51 years old and i was born in a fishing town called IJmuiden, and live now in the city Dordrecht, a city with a lot of artists.

At the age of 5 I started to draw in a sketchbook and draw almost every day mostly ships.

At the age of 13 to draw make place for to making music and play in different bands.

In august 2017 I give up the music and wanted to draw again and I was not thinking to paint. Learning wet on wet for 6 months and then I started to paint realistic/ fotorealistic. So in the year 2018 my painting Ganzeneiland was nominated for painting of the year. This results in an inventation by Marjon Zimmermann for an exhibition. I also has an inventation for the Annual Dutch Art Fair in the world fassion centre in Amsterdam. And I get an inventation for a art magazine VIND.

So in the year 2019 my painting A bridge to Chatsworth house was nominated for painting of the year.

I also started my unique collection of paintings called The Waterdrop Collection, here you see landscapes closed in some waterdrops with the theme the world falling apart without water.

So now I'm standing for the second time in Hamburg by MarziArt
